BASIC DATA	It is the minimum common set of information that can be provided by LR in any Member State.											
SUPPLEMENTARY DATA	It's the additional information that can be included in accordance with a LR system along with the basic data. Every national legislation determine what kind of LR information can be published or provided apart from the very basic one (such as physical data, maps...)											
ASSOCIATED DATA	It's any type of land or territorial information which could be linked to the registered properties for purposes of providing the land context or information about the land uses, characteristics of the soil, land-planning or other related to that territory into which a property was inserted.											
LOCATION CORE VOCABULARY	https://joinup.ec.europa.eu/asset/core_location/asset_release/core-location-vocabulary-100#download-links The ISA Programme Location Core Vocabulary provides a minimum set of classes and properties for describing any place in terms of its name, address or geometry. The vocabulary is specifically designed to aid the publication of data that is interoperable with EU INSPIRE Directive . It is closely integrated with the Business and Person Core Vocabularies of the EU ISA Programme, now available in W3C space as, respectively, the Registered Organization vocabulary and ISA Person Core Vocabulary .											
PERSON CORE VOCABULARY	https://joinup.ec.europa.eu/asset/core_vocabularies/description The Core Person Vocabulary is a simplified, reusable and extensible data model that captures the fundamental characteristics of a person, e.g. the name, the gender, the date of birth, the location											
BUSINESS CORE VOCABULARY	https://joinup.ec.europa.eu/asset/core_vocabularies/description The Core Business Vocabulary is a simplified, reusable and extensible data model that captures the fundamental characteristics of a legal entity, e.g. the legal name, the activity, address, ...											
LAND REGISTRY UNIT	LR Units are all properties or entities with individual register and/or title number assigned in accordance with rules which govern each Land Register system.
