

(already) a common denominator?

Quick scan on the (many) national
defined information models & output
formats

Facts

- Request for information & print screens (18/03)
- Received information:
 - (only) 11 contributions;
 - very diverse;
 - Screenshots/ descriptions
- Input 1st Day of IMOLA seminar (03/04)

Towards a common denominator ?

- Most countries, but not all:
 - Information by electronic means;
 - form of excerpts not established in law;
 - present info in another way is technical issue;
 - certified AND uncertified information;
 - opening with a parcel or a person;
- ABC seems a good structure!
- Property identifier ! (Cadastral/ LR number)

Diversity means...

- Support all kinds of search entries;
- Support real & person folio;
- Support payments of fees;
- Different organisations within one MS;
- Open data regimes vs. legitimate interest;
- Different output (uncert. & certified);

**Description
of the
property**
