

Interconnection of Land Registers: a statement by the European Land Registry Association

The members of ELRA want to make land registry information more readily available to support cross-border activity, to support the 4 freedoms and to facilitate judicial co-operation.

ELRA is therefore pleased to work with the European Institutions on projects that will help to achieve this.

The Commission's current Interconnection Project is based upon,

- Voluntary participation,
- Respect for legal diversity, and
- The land registries retaining control of what information is supplied, to whom it is supplied and on what basis it is supplied.

ELRA is pleased to support the Project on this basis.
