

EUROPEAN NEWS

New EU rules to combat money-laundering adopted

The European Parliament has adopted a package of laws to strengthen the EU's toolkit in combating money laundering and terrorist financing. These new laws ensure immediate and free access to information about real ownership in national and EU registries for individuals with a legitimate interest.

Artificial Intelligence Act: MEPs adopt landmark law

Letta's Report: The Future of the Single Market

Fomer Italian Prime Minister Enrico Letta presented a report on the future of the single market at the European Council, highlights the single market's significance for European integration and shared prosperity. Letta's insights, drawn from interactions at events like SME Assembly, offer valuable contributions to ongoing debates and concerns surrounding the single market's evolution and future.

SPAIN

May 9th

Colegio de Registradores de España Goes Fully Electronic

Spain leads globally with full digitalization of its registry system, under Law 11/2023, which transposes EU Directive 2019/1151 on digitalisation of notarial and registry proceedings.

Minister Félix Bolaños heralds this as a pivotal move into the digital age, enhancing reliability and legal security. The transformation includes electronic registration consolidation and new citizen-centric services and video assistance, ensuring transparency and accessibility while maintaining personalized attention. This comprehensive digitization modernizes procedures and reinforces Spain's commitment to legal certainty, marking a seamless transition toward a digitally-driven future.
